

University Management System (UMS)

User Guidelines & Operating Manual

Welcome to the **University Management System (UMS)**. This comprehensive guide outlines how to navigate and utilize the system based on your assigned role: **Administrator**, **Instructor**, or **Student**.

1. Getting Started: The Login Process

Every user must authenticate through the centralized login screen to access their specific dashboard.

How to Log In:

1. Launch the **University Management System** application.
2. Enter your assigned credential in the **Username** field.
3. Enter your password in the **Password** field.
4. Click the **Login** button.

Error Handling & Validation Rules:

- **Missing Fields:** If either the username or password field is left empty, the system will display an error message: `username and password is required!`.
- **Incorrect Credentials:** If the credentials do not match any active records in the database, the system will display: `invalid username or password!`.
- **Role Redirection:** Upon successful validation, the system automatically detects your role (`admin`, `instructor`, or `student`) and redirects you to your dedicated portal.

2. Administrator Portal (**FormAdmin**)

The Administrator portal handles systemic management. The interface is organized into four main operational tabs:

A. User Management (Active Tab)

This section allows you to manage system credentials and roles for everyone in the university.

- **View Users:** The left-hand panel displays a grid list of registered user **IDs**.

- **Create a User:** 1. Select the account type from the **role** dropdown menu (**admin**, **instructor**, or **student**). 2. Input a unique **ID**, **username**, and secure **password**. 3. Click **Add New**.
- **Modify a User:** Select a user from the ID list, update their fields, and click **Update**.
- **Delete a User:** Select a user from the list and click **Remove**.

B. Additional Admin Responsibilities

Use the remaining tabs to configure high-level university infrastructure:

- **Course Management Tab:** Create, update, or remove courses from the university curriculum.
- **Department Management Tab:** Manage institutional departments and assign administrative boundaries.
- **Reporting & Analysis Tab:** Pull institutional data, metrics, and system-wide summaries.

3. Instructor Portal (**FormInstructor**)

The Instructor portal provides faculty members with access to their professional profile and their course enrollments.

A. Profile Tab (Active Tab)

This view displays your official HR and institutional data recorded in the system database:

- **dept name:** The department to which you are officially assigned.
- **ID:** Your unique faculty identification number.
- **name:** Your full legal name.
- **salary:** Your current registered salary details.

B. Student Rosters Tab

- Click this tab to view lists of students currently enrolled in the sections and courses you are scheduled to teach.

4. Student Portal (**FormStudent**)

The Student portal allows active students to track their academic progress and manage class schedules.

A. Profile Tab (Active Tab)

- **Demographic Sidebar:** Displays your academic metadata including assigned **dept name**, unique **ID**, **name**, and **tot cred** (total completed credits accumulated toward graduation).
- **Academic History Grid:** The right-hand panel features a detailed ledger of your historical performance across semesters:
 - **course_id** & **sec_id**: The exact tracking markers for past classes.
 - **semester** & **year**: When the course was taken.
 - **grade**: Your finalized mark for the course.

B. Enroll Tab

- Click this tab to open the course registration module, where you can select and enroll in available classes for upcoming terms.
